

## WELCOME TO BEER & BIRD!

We're passionate about beer! The simple combination of fermented grains, water and hops, has been consumed by humans for over 7000 years, and was throughout much of history a preferred and safer alternative to water!

For the past 50 years, global brewing has been dominated by a handful of multi-national companies, churning out mass-produced product on a vast scale. In more recent times, craft brewers are making their voices heard; producing exceptional beers on a smaller scale, focusing on quality rather than volume.

It is this ethos that sets craft beer apart, and a value that we share in our business.

In the following menu, we'd like to share with you a careful selection of our favourite beers from around the World, categorised into different styles for ease of reference.

Some are based on centuries-old recipes; others are fresh, innovative brews from local producers. All have been selected for their exceptional taste and quality.

We hope you enjoy your journey into the wonderful world of craft beer!

**\*In addition to our core menu, we also offer an ever-changing selection in cask and keg, plus a dedicated specials list. Please ask your server for more information.**

\*\*Look out for  = Vegan Friendly and  = Gluten Free
